Navigating the Web

How to browse the web

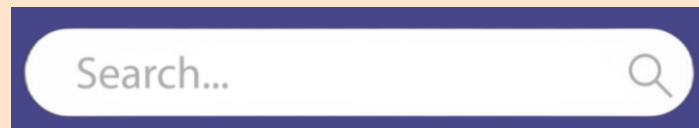

iPhone Users: 

Android Users: 

Alternate Apps to download:  
(Google and Google Chrome)

- Tap on the icon that correlates to your phone to open your web browser.
- Once the app is open, click on the bar that says search:

- Then type in what you would like to research.
- Many results should appear, and to proceed click on the desired website or photo.
- To find more results, look for the section that looks like this and select the one you would like.

How to use YouTube

- YouTube is a video streaming service. You can find “how to” videos, music videos, movies, and more!
- Click on the app that looks like the image to the right.

→ Youtube is a very similar process to browsing the web. Click the search bar and type in what you are looking for. Many results should appear. Tap on your desired result.
